

9.10.120 Garbage.

- A. "Garbage" means putrescible wastes including kitchen and table food wastes; animal or vegetable wastes resulting from the storage, preparation, cooking, processing or handling of foodstuffs; nonputrescible wastes that are mixed in the same container with or are contaminated by putrescible wastes; infectious wastes, such as used tissues and disposable diapers, which are normally produced at residential premises; small dead animals not exceeding ten pounds in weight; and any putrefactive or easily decomposable waste material that is likely to attract flies, vermin, birds or rodents.
- B. Garbage does not include materials that are separated and set aside for recycling or composting and does not include hazardous material.
- C. The determination as to whether material is garbage shall be made by the director based on a consideration of the purposes of this chapter.

(Ord. 24315.)
