

Guidelines for Eco-station Set-up

Example: Eco-station using ClearStream™ containers.

- Trash containers should always be placed *directly* beside recycling and/or composting containers
 - Compost containers should be used when compostable food serviceware is utilized **AND** can be processed separately from trash (i.e., make sure compost dumpsters and hauling services are available)
 - For outside events, secure containers to prevent strong winds from blowing them over
- Use the same container type for all stations to prevent confusion
- Place containers side-by-side in same order for each station (example: blue, green, black)
- Include “what goes where signs,” preferably at eye level when possible, on each container for every station
- For consistency, use the same signs for each container type at each station
- Work with event planners to place eco-stations in high traffic, visible areas that do not conflict with fire marshal requirements (i.e., entrances, exits, bathrooms, etc.)
- If using bags for collection, use clear bags for recycling and green bags for compostables and black bags for trash for ease of identification.
 - See “Additional Resources” for a list of clear and compostable bag suppliers.
- Clearly mark all dumpsters so all staff and event workers know where to correctly dispose of materials
- Remove or cover all stand alone trash cans throughout attendee areas

How to Install Bags on ClearStream™ Eco-station Frames

1. Pull bag through the Loop 6"

1. 6 pulgadas a taves del aro

2. Pull bag over the Loop 3"

2. 3 pulgadas por encima del aro

3. Pull sides down & in!

3. Jala los lados hacia abajo y adentro

Assemble ClearStream™ Eco-stations as follows:

Blue Plastic Bottles and Aluminum Cans stand must be lined with the clear bag (printed **blue** recycle symbol). Printing on the bag must face out and must be covered with blue lid.

Green Compostable stand must be lined with green bags with the green wide mouth top

The black trash stand must be lined with a black bag with the writing facing outward
